GRASSES AND SEDGES

SUITABLE FOR

Lawns, Parks, Gardens, Rockeries,
Lakes and Ponds

WILFRED A. BROTHERTON, & COMPANY,
ROCHESTER, MICH., U. S. A.

1893.

TO OUR FRIENDS AND CUSTOMERS.

The list of Michigan plants we present in this catalogue includes seven hundred and fifty species, which are adapted to a wide range of soil and moisture, and can endure the climate of almost any part of the temperate zone. These facts are meeting with a steady appreciation as is shown by a constantly increasing demand for our native plants for developing the natural beauties of lawns, parks and grounds, as well as adding to the ornaments of the flower garden.

We will cheerfully furnish information on the habits, methods of handling, value, and uses of any of our native plants.

Terms: Cash must accompany all orders under \$5. From unknown correspondents references or remittance of five per cent. of amount must accompany order. A discount of 5 per cent. will be allowed when cash accompanies order. All bills are due on receipt of goods.

Remittances can be made by check, express or P. O. order or by registered letter. Foreign remittances can be made by draft on New York, Chicago or Detroit.

Shipments are made at the purchaser's risk. Mail orders must be accompanied by ten per cent. additional to prepay postage.

Special Discounts will be quoted on orders of 5000 of any single plant.

Charges extra for packing, boxes, barrels, etc.

All plants are carefully packed and can be safely shipped to any part of the world.

Complaints should be made on receipt of goods. We promise just treatment.

Seeds Estimates on seeds in any quantity will be furnished on application.

W. A. BROTHERTON & CO.,

ROCHESTER, MICH.

GARDENING.

This is the new gardening paper designed to teach every branch of horticulture, more especially that most useful to amateurs. It is a semi-monthly journal, appearing on the 1st and 15th of each month, and the price is ONE DOLLAR a year.

The editor is well known all over the country as one of our most eminent practical gardeners, and pungent and pointed writers, and he is thoroughly conversant with every detail in horticulture. He was, during the first two years of its life, associate editor of the *London Garden*. For seven and a half years he was Superintendent of the Botanical Gardens of Harvard University, and he is now and has been for the past nine years superintendent of Mr. Chas. A. Dana's Dosoris Gardens, Long Island.

The Dosoris Gardens will be a prominent factor in the teachings of this paper. They comprise some fifty acres solely devoted to ornamental and useful gardening, conducted exclusively for the sake of art and knowledge; and they include an inimitable collection of hardy trees, shrubs, vines, and other decorative plants, together with greenhouses and vineyards, orchard, and other fruits, and the most extensive vegetable garden, so far as the variety is concerned, in the country. And novelties as soon as they are disseminated are obtained and tested.

In connection with any other gardening paper there is no experimental garden in the world to compare with the Dosoris Gardens and the readers of the *GARDENING* shall have the full benefit of all the information suggested or confirmed by the practice, tests and experiments as conducted in these gardens.

THE FLOWER GARDEN. Every variety of flower-gardening will be embraced, and particular stress will be laid on hardy flowers and how to use them, with many pictures taken from photographs showing how. Every new plant, hardy or tender, annual or perennial, will be grown, tested and reported on.

TREES AND SHRUBS.—As Dosoris contains the most magnificent and best cared for collection of these in the country, the readers of *GARDENING* have a treat in store for them, both in the way of positive knowledge of the subject handled and a multitude of beautiful pictures.

THE FRUIT GARDEN.—Including apples, pears, peaches and all manner of tree fruits throughout the country; grapes, blackberries, raspberries, strawberries, currants and all manner of small fruits will be written about by men who make a living growing these fruits.

THE VEGETABLE GARDEN.—In the Dosoris garden a greater variety of vegetable is grown than in any other garden in the country, and everything that is new is tested. Its light will shine in *GARDENING*; and, too, the best gardeners in the country will tell what they know about vegetables; old and new, and how to grow them.

THE GREENHOUSE.—From the smallest greenhouse owned by the cottager to the pretentious ranges of millionaires and the glass villages of commercial florists, will be given, also how to build them securely, economically, and to look well and at the same time be best adapted for growing plants in. They will include structures for fine foliaged and fine flowered plants, roses, carnations, violets, and miscellaneous plants, also orchids; and graperies and other fruit houses and forcing and vegetable houses. Also hotbeds and cold frames.

WINDOW GARDENING is a regular department of *GARDENING*, and skillful amateurs there relate their experience in this line.

Its **ILLUSTRATIONS** are numerous and incomparably the finest, most pointed and instructive that have ever appeared in any paper, and they are from life.

Subscription price, \$1.00 a year—24 numbers.

THE GARDENING CO., MONON BUILDING, CHICAGO.

American Gardening

A Pretty Garden Home For \$1.00

A GREAT DOLLAR'S WORTH

IS THE COUNT RIGHT?

1. More than 800 beautifully printed pages of fresh, bright, readable, practical matter.
2. About 900 choice illustrations that illustrate.
3. The benefit of several large experiment gardens and orchards in widely separate localities.
4. The work of scholarly editors who are skillful horticulturists.
5. A magazine for every lover of nature; the man or woman who owns a geranium, a flower bed, or a costly lawn; every one who "sits under his own vine and fig tree;" the suburban resident and country gentleman; the commercial florist, the fruit grower, and the gardener.
6. Artistic plans by landscape architects for laying out readers' grounds, in every issue, such as cost hundreds of dollars in the usual way.
7. An inquiry department which answers all questions from readers.
8. All in all the most complete and profusely illustrated gardening journal in the world. Yet it costs only \$1 a year.
